

Smart workplace with Teams

Do everything together in one place

Teams is the smart place to work. With Microsoft Teams and Teams Phone, you can effortlessly switch between chat and phone calls, so you can have more productive conversations and make faster decisions.

You can access your apps, tools, and message and call history from anywhere, so you can stay connected and productive whether you're at home, in the office, or on the go. Plus, with enterprise-grade security, you can communicate securely and reliably with your team and customers.

"Thanks to Microsoft Teams, we now have a single platform that facilitates telephony, presentations, and video conferences in one—a solution that is quick, simple, and stable."

– Henrik Hausen, CEO, all4cloud

Transform your work with solutions that empower your team to learn, create, and innovate together...

Collaborate and connect from almost anywhere

- Shift seamlessly between devices and spaces without interruption to the flow of work.
- Make collaboration and communication easy and hassle-free with a consistent and intuitive Teams interface.
- Foster inclusive and interactive connections for everyone, regardless of where they are or how they connect.

Protect, control, and manage access to data

- Discuss sensitive information in confidence with end-to-end encryption for 1:1 calls and meetings.
- Minimize distractions and protect your employees from potential spam, fraud, and more with advanced call controls.
- Safeguard sensitive meeting information, automate meeting controls and deter leaks so you can securely collaborate.

Unlock the future of collaboration

- AI-powered capabilities help improve productivity and keep you and your team focused on high value work.
- Reduce inefficiencies and work smarter by bringing together calling, chat, and meetings.
- Get ready for Microsoft 365 Copilot* to lighten the load. Stay tuned for more details coming soon.

*Available to a wider audience in the coming months.

More productive meetings, communications, and collaboration—Teams and Teams Phone make it easier to work together, anywhere.

Strengthen hybrid work culture

- Empower every person to feel seen, heard, and included in the conversation.
- Meet, chat, and collaborate from almost anywhere.
- Support a wide range of meetings: one-on-one, in small groups, or with up to 300 people.
- Use professional features like virtual backgrounds, screen sharing, and recording.

Keep work and information safe

- Ensure employees have the apps and data they need to get work done, wherever they are.
- Maximize device choice and flexibility while minimizing security risks.
- Protect and control company data on employee-owned devices.
- Reduce costs by simplifying security and replacing third-party solutions.
- Unify device management in a single solution to save time and gain visibility.
- Protect data from loss or breach with built-in security.

Focus on what matters

- Boost productivity and improve the speed of business with intelligent features that are built for efficiency.
- Make teamwork easy with flexible workspaces.
- Reduce inefficiencies and work smarter by bringing together calling, chat, and meetings.
- Optimize communications inside and outside our business with intelligent call routing and automated flows.
